WHEREAS, continued disease monitoring and surveillance in the 1-km and 7-km surveillance zones surrounding the affected farms yielded negative test results for influenza type A virus;

WHEREAS, Article 10.4.6. of the World Organisation for Animal Health (WOAH, founded as OIE), Terrestrial Animal Health Code (2021) provides that the Avian Influenza free status of a previously free country or zone may be regained after a minimum period of 28 days after a stamping-out policy has been completed; disinfection of the last affected establishment was carried out and that consequent surveillance demonstrated the absence of infection;

WHEREAS, prior to the confirmation of the first case of HPAI H5N1 in Ilocos Sur, the province had been free from avian influenza in poultry and through the joint efforts of the LGU, DARFO, and BAI applying effective disease control measures such as stamping out, cleaning and disinfection operations, biosecurity and other quarantine activities, the risk of further spread from infected premises were effected without delay;
